THE HOSE

the main component of your hose pump

Engineered by Tapflo for superior performance

Quality design

Exclusively **European made**

Crafted with the finest **quality compounds**

Manufactured according to the **highest industry standards**

☑ Longest lifetime

Hose pumps can pump **abrasive, corrosive and aggressive liquids** with particles. To optimize the lifetime of the hose you need to enhance various factors that act together:

- pump **speed**
- pump **operating time** (continuous/intermittent/occasional)
- pump discharge **pressure / shimming** strategy
- the **temperature of the liquid** being pumped

These parameters combined with a precise tolerance lead to a **better hose lifetime of 30%** than other hoses on the market.

☑ Better lubricant adhesion

- **less friction and lower heat build-up between the shoes and the hose**

Widest choice & quickest delivery

- over **7000 hoses** available directly from our stock
- fast **delivery worldwide**
- materials: **NR (FDA), NBR (FDA), EPDM (FDA) , CSM**
- sizes: **from ID5 up to ID125mm**
- **types**: extruded hoses, standard hoses, special hoses (full EPDM, special lengths)
- special hoses with **extra reinforcement** for the most difficult applications (ex. filter press)

Documentation & Certification

- **datasheet** for every hose
- explicit **shimming chart**
- **certificates** can be provided upon special request

Certificates may vary depending on the material execution of a particular product.

Professional packaging

- **horizontally packed** on a pallet - hoses can also be bent to optimize transport costs
- packed in blue foil **for better storage and transport**
- **clear sticker label** for precise part identification
- inalterable **hose marking** for better identification even in the most demanding applications

Compatible for other brands

- designed not only for Tapflo hose pumps but also **compatible with most other pump manufacturers**
- **increasing efficiency & reliability** of your hose pump
