OMWO

Open mains water outlet

The open mains water outlet unit with a free outlet is electrically controlled
It is available in sizes from 3/4" to 2" and meets the requirements of DIN EN 1717.

When water is required, the solenoid valve opens and drains the main water into the stainless steel funnel. The solenoid valve works with 230 V AC and can be controlled also automatically. The outlet funnel fits standard pipes with sockets with rubber seals. The separation device ensures compliance with regulations.

Features:

- Stainless steel inlet funnel with a splash-free injection nozzle
- Solenoid valve with a connecting cable and Schuko plug for electrical control (optional)
- Braided stainless steel connecting hose for a secure connection
- Brass ball valve with a stainless steel impurity strainer (mesh size: 0.25 mm)
